AMENDMENT

Commissioner for Patents
Washington, D.C. 20231

In response to the Office Action dated February 24, 2003, please amend the above-identified patent application as follows:

IN THE CLAIMS

1. (Once Amended) A radio frequency/microwave junction-type circulator, comprising:

a plurality of signal ports;

a plurality of junctions connected in cascade and configured to provide a plurality of transmission paths between the signal ports, each junction including a conductor element patterned to correspond to at least a portion of the plurality of transmission paths;

a ferrite component configured to overlay the plurality of junctions;

a permanent magnet arranged in relation to the ferrite component so as to generate a magnetic field in the ferrite component, thereby causing non-reciprocal operation of the plurality of transmission paths between the signal ports; and

at least a first pole piece disposed between the permanent magnet and the ferrite component.
